

PRIME 4+ WHITE

4-DECK STANDALONE DJ CONTROLLER IN SPECIAL EDITION WHITE FINISH

PROVEN PERFORMANCE, FRESH CLEAN LOOK

The PRIME 4+ WHITE Special Edition brings a fresh new look and next-level features to the legendary performance power of the PRIME 4+. With unrivaled music accessibility, new dynamic FX options, 10% larger jog wheel surface, and the ever-expanding performance features of Engine DJ, the PRIME 4+ is well-equipped for any DJ style. Now with a fresh, special edition white finish, the PRIME 4+ WHITE is perfectly suited for any wedding or mobile event where an ultra-clean aesthetic is appreciated.

CREATED FOR DJS, BY DJS

Designed for the working DJ, the PRIME 4 + WHITE seamlessly fuses the expansive creative potential of four standalone decks with unparalleled professional features and robust construction, guaranteeing consistent and reliable DJ performances night after night and gig after gig. With two distinct microphone mixer sections, you, your MC, or your guests always sound their best, thanks to dedicated EQ, volume, and FX controls, along with automatic talkover options. While taking command of the main dancefloor, you can effortlessly route a secondary mix or playlist to a separate lounge or cocktail area using the Independent Zone Output, increasing your adaptability and value as a professional working DJ.

EFFORTLESSLY HANDLE ANY REQUEST

The PRIME 4+ WHITE leads the DJ industry in terms of streaming music support, providing instant access to over 100 million tracks spanning all genres. Its lightning-fast onboard analysis efficiently buffers streaming tracks into internal memory, ensuring uninterrupted playback from any Wi-Fi source or cellphone hotspot. With its fully routable Bluetooth Audio Input capability, the PRIME 4+ WHITE can easily handle playing songs from smartphones and other compatible Bluetooth devices.

ADVANCED DYNAMIC FX SUITE

The PRIME 4+ WHITE boasts 29 fully customizable Main FX and 4 dynamic, knob-controlled Sweep FX so that you can unleash your full creative mixing potential. The two Main FX sections feature dedicated OLED displays, knobs, and buttons to dial in and manipulate the frequency, parameters, beat divisions, and wet/dry mix of the selected FX. For creative build-ups and transitions, the 4 Sweep FX are automatically engaged by turning the Sweep FX knob on each channel and can be layered with the Main FX for endless immersive FX combinations. The expressive Touch FX transforms the 10.1" touchscreen into an XY controller, and the volume slider triggered Fader Echo puts additional FX options and parameter manipulation literally at your fingertips!

UNMATCHED INTEGRATED LIGHTING CONTROL

The PRIME 4+ WHITE simplifies the setup and execution of an immersive lighting experience for any event. With the power of Engine Lighting, you have access to custom or automatic light shows for both saved and streaming tracks. Complete control over color, dimming, chase sequence, moving head position, strobe, blackout, and even on/off control for cold spark fountains, dry ice machines, and haze or fog is available with a quick tap of the screen.

ONGOING FEATURE-PACKED UPDATES

Operating on Engine DJ, the PRIME 4+ WHITE receives new features with each update. Engine DJ has consistently provided new innovations for DJs by introducing key features first, including Wi-Fi, embedded sampler, and lighting control. Recent updates, such as Bluetooth Audio Input, Engine DJ Profiles, Fader Echo, Touch FX, Performance Pad Display, and Remote Engine Library, further reinforce why Engine DJ stands as the most powerful DJ operating system globally. Convenient over-the-air updates via Wi-Fi keep you informed when updates are available, ensuring you stay on the cutting edge of DJ performance technology.

LIMITLESS SOURCE OPTIONS

Access vast music libraries through four USB inputs, one SD card slot, and an under-panel 2.5-inch built-in SATA drive bay. Connect to external media players, turntables, or audio sources using the 4 phono/line switchable RCA inputs. Choose any of these media sources or inputs to record your entire DJ set performance. With USB and Bluetooth keyboard support for optimized track browsing and playback capabilities for uncompressed audio formats (FLAC, ALAC, WAV), the PRIME 4+ WHITE provides immediate, hassle-free access to your entire music library and external audio sources.

FEATURE LIST

- Stunning special edition white finish
- 4-Deck standalone DJ controller for computer-free DJ performances
- Engine DJ operating system with continuous feature-packed updates
- 10.1-inch HD multi-touch display
- Wi-Fi music streaming for access to millions of tracks from Amazon Music Unlimited, TIDAL, Beatsource, Beatport, Soundcloud GO+, Dropbox
- Fully routable Bluetooth Audio Input with hardware controls
- Embedded Sampler with 16 pad-triggered sample slots, volume control, and output routing
- First-ever standalone Stems functionality for real-time vocal and instrument isolation (currently in Beta)
- Touch FX for interactive touchscreen audio manipulation
- 26 Main FX with OLED displays and parameter controls
- 4 dynamic, knob-controlled Sweep FX (combinable with Main FX)
- Fader Echo (volume slider triggered echo FX)
- Embedded lighting control for automatic and customized DMX, Philips Hue, and Nanoleaf light shows
- (4) USB and (1) SD media inputs for music playback
- Engine Remote Desktop for wireless access to computer-based music library
- On-board song analysis for streaming tracks and saved media
- 16 performance pads with Hot Cue, Saved Loop, Auto Loop, Roll, Sampler, Slicer, and Slicer Loop modes
- Rugged metal chassis and steel knob stems for ultimate reliability
- Dedicated XLR Zone output with EQ and volume control for sending playlists and tracks to a separate room
- Built-in 2.5-inch SATA drive bay to store music on-board
- 6-inch metal jog wheel with expanded touch surface, assignable color, and center HD displays for album art
- (4) assignable input channels for Line/Phono external media sources
- (2) dedicated ¼" XLR combination inputs for microphones with level, EQ, Talkover, and Echo controls
- Internal audio recorder for capturing live performances
- Fully customizable crossfader with curve control knob, channel assignment switches, and Fader Start
- StagelinQ connection for Event/Pro DJ lighting and video control
- Plays uncompressed audio formats (FLAC, ALAC, WAV)
- Crisp 24-bit Denon DJ legacy audio
- USB and Bluetooth keyboard support
- Computer Mode for use as a controller for Serato DJ Pro (hardware unlocks) and Virtual DJ (license required)
